Art Unit: 2653

1) The amendment filed 8/01/2005 is acknowledged.

2) The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

3) (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4) Claim 7 is rejected under 35 U.S.C. 102(e) as being anticipated by MAIER et al ( 6,928,037 ).

MAIER et al discloses a method for performing a track skip of a read device between a current track and a selected track of an optical storage disk inserted in a playback device as claimed in claim 7, comprises the steps of:

moving the read device in a direction of a lead-in area of the optical storage disk until a starting position is detected, in response to a track skip request ( figure 1, the optical pick-up moves to run-in area 4 for start position, see also the abstract );

Art Unit: 2653

determining a time required for the track skip from start position to selected track, as a function of tracks to be skipped and moving the read device in a direction of the selected track ( column 3, line 35 to column 4, line 24 ).

5) Claims 8 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6) Claims 10-12 are allowed.

7) Applicant's arguments with respect to claims 7-12 have been considered but are moot in view of the new ground(s) of rejection.

8) Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREEMONTHS from the mailing date of this action. In the event a first reply is filed within TWOMONTHS of the mailing

date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

9) The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. ( See form PTO-892 attached herein ).

Applicant is reminded that in amending in response to a rejection of claims ( if the rejection involves with any applicable arts ), the patentable novelty must be clearly shown in view of the state of the art disclosed by the references cited and the objection made. Applicant must also show how the amendments avoid such references and objections. See 37 CFR § 1.111(c).
